

FANTOM FUEL SATIVA HYBRID

Proudly grown in Wessington, SD

LET'S INTRODUCE YOU!

- Fantom Fuel brings you a mix of two of our very popular strains. Combining Ghost Punch (which has our Ghost Magic OG in it) and Lilac Diesel! Ghost Punch's earthy & fruity smells combines with Lilac Diesel's fuel & citrus smells to create a fruity, citrus concoction. With one indica leaning strain and one sativa leaning strain, we really had to rely on testing to find out where Fantom Fuel leaned. With an overwhelming amount of the limonene terpene, we can infer that the effects of this new strain will lean more towards sativa! Try it for yourself!
- **Top Terpenes: Limonene, Caryophyllene, and Linalool**
- **Terpenes present may relieve: anxiety, inflammation, pain, and depression**

ITS LINEAGE

- **Ghost Punch**
 - Combining our Ghost Magic OG with our (discontinued) Pomegranate Punch F2, this strain combines the relaxing and sedative effects with it's energized and euphoric effects of Pom Punch. Ghost Punch is a high THC Strain with percentages as high as 30.1. It also boasts smells from both its parent strains with earthy yet fruity smells.
- **Lilac Diesel**
 - Bred by Ethos Genetics, Lilac Diesel crosses numerous genetics to bring an entirely new strain to the market. A Silver Lemon Haze x Forbidden Fruit is crossed with NYC Cherry Pie and Citral Glue to bring out this flavorful chemy strain. As you pull apart each glittering little nugget, aromas of sharp chemical diesel and sweet fruity berry are released, all with a spicy overtone. The flavor is on the lighter side of things, with a sweet fruity berry taste that's accented by sour citrus and pine. The Lilac Diesel high is just as delicious as the flavor, with creative and energizing effects that will have you feeling lifted and relaxed in no time at all.
