

## BLACK CHERRY INDICA HYBRID

Proudly grown in Wessington, SD

### LET'S INTRODUCE YOU!

- A marriage between the OG Black Cherry and Jilly Bean brings you a symphony of fruity flavors. Black Cherry's beautiful purple hue brings with it an aroma of tea as well. With Caryophyllene as the prominent terpene, it can aid in relief from chronic pain and inflammation. Jilly Bean also has fruity flavors of orange and peach. The dominant terpene in this strain is Myrcene, which can help you relax and reduce stress and anxiety.
- **Top Terps: Caryophyllene and Myrcene**

### IT'S LINEAGE

- **Black Cherry OG**
  - Black Cherry is an indica marijuana strain bred by Grand Daddy Purple that combines Ken's OG with an unknown Granddaddy Purple hybrid. Dense buds take on an intense purple hue at the end of Black Cherry OG's maturation and develop a sweet aroma like fruity tea. It's most dominant terpene is Caryophyllene.
- **Jilly Bean**
  - Jillybean, also called "Jilly Bean," is a hybrid marijuana strain bred by crossing Orange Velvet and Space Queen. This strain promotes creativity and produces euphoric, uplifting effects. The flavor of Jillybean tastes like tangy oranges and mango. Jillybean is the ideal strain for social butterflies and anyone looking to add extra happiness to their day. The most dominant terpene is Myrcene.
