The minty smell of Thin Mint along with the citrusy sweet notes of Cali Sunset, this strain will have you yearning for summer nights.
- **Top Terps: limonene, nerolidol and caryophyllene**

IT'S LINEAGE

- **Thin Mint**
 - Thin Mint is a hybrid marijuana strain that was one of the main sub-types of the legendary GSC strain. Dark green and royal purple hues peek through a heavy coat of crystals, with a sweet minty smell that gives a full explanation of this strain's name. Thin Mint calls upon the powers of its indica, sativa, and hybrid ancestors for a powerful full-body effect that gives this strain its sterling reputation. The high psychoactivity of this strain is not for novice consumers.
- **Cali Sunset**
 - Cali Sunset is an indica hybrid that has creamy, citrusy, and sweet notes. The indica effects of Sunset Sherbert will have you melting into your seat while the uplifting effects from the Jealousy strain will bring you a body buzz with a euphoric kick. The terpenes in this strain are Caryophyllene, Limonene, and Myrcene.
